# Kihonkai Karate Academy

More than a karate club

## Membership and Fee Structure 2019

The membership structure and method of payment has been designed so that we deliver the highest quality of training to all students. Instructors will devote as much time as possible to the personal needs of students and the continual development of the syllabus. Instructors will not be involved in collection of regular fees, these will be collected by a management company - NEST Management Limited - who specialise in the collection of fees from the members. The primary aim of the Academy structure is to allow members to make a commitment to their Karate training and to attend as often as possible at a price that represents excellent value for money.

Fees are charged monthly based on an annual program calculated on 48 weeks of training paid in 12 equal monthly payments
